Question of Cyprus

Oceans and the law of the sea

Security Council
Seventy-first year

Letter dated 29 February 2016 from the Permanent Representative of Cyprus to the United Nations addressed to the Secretary-General

Upon instructions from my Government, I have the honour to draw your attention, in your capacity as depositary of the United Nations Convention on the Law of the Sea, to yet another provocative and illegal act by the Republic of Turkey in the exclusive economic zone (EEZ) of the Republic of Cyprus, in violation of the sovereign rights and jurisdiction of the Republic of Cyprus in its EEZ and over its continental shelf, as reflected in the Convention and relevant customary international law.

On 17 December 2015, a navy vessel of the Republic of Turkey approached and harassed the vessel MV *Flying Enterprise*, flying the flag of the Republic of Cyprus. It is noted that MV *Flying Enterprise* was duly licensed through the competent authority of the Republic to conduct a geophysical survey on behalf of a legal entity of a third country, in the south of Cyprus within its EEZ/continental shelf (see annex) and a relevant navigational warning (NAVTEX No. 09/16) was issued for this purpose.

According to the investigation carried out by the Cyprus Police, the incident occurred as follows:

- On 17 December 2015, at 1130 UTC, the MV *Flying Enterprise*, during its survey operations, at position 34°10'3"N/32°28'4"E (point 1 on map in annex), received a call by a Turkish warship, the TCG *Gediz* (ID F-495), on channel 16/69 requesting information concerning its identity and activities.
- At 1507 UTC, at position 34°09'5"N/32°16'7"E (point 2 on map in annex), the said warship called on the MV *Flying Enterprise*, via VHF 69, and instructed its captain to stop all survey operations and change course and speed by reason of entering a "Turkish maritime restricted area".
- At 1600 UTC, the same warship, via VHF 69, again instructed the MV *Flying Enterprise*, which continued its survey operations, to stop all operations,

Please recycle

collect all equipment and change course and speed by reason of entering a "Turkish maritime restricted area".

- The MV *Flying Enterprise* continued its operations while the Turkish warship, heading with parallel course and same speed, remained at a distance of 2.5 nautical miles from it.

At all times during the incident described above, the MV *Flying Enterprise* was within the EEZ/continental shelf of the Republic of Cyprus, in a marine area which has already been delimited between the relevant opposite coastal States, namely the Republic of Cyprus and the Arab Republic of Egypt, by means of an EEZ Delimitation Agreement (2003). It is also pointed out that the MV *Flying Enterprise* was carrying out a survey for the purpose of cable laying in the Cypriot EEZ/continental shelf, having obtained authorization from the competent Cypriot authorities, in accordance with the Cypriot Geological Surveys Law (Law 140(I)/2013) and the Submarine Cables Regulations (No. 578/2014), which implement article 79 of the United Nations Convention on the Law of the Sea, which is applicable mutatis mutandis in the EEZ of a coastal State by virtue of article 56 (3) of the Convention and which also reflects customary international law.

The Republic of Cyprus wishes to stress that the Republic of Turkey, being the State responsible for the official acts of its navy, abused the freedom of navigation that its war vessels enjoy in order to harass the MV *Flying Enterprise*.

The vessel of the Turkish navy had no jurisdiction and/or right to either intervene or instruct the MV *Flying Enterprise* in any way. By doing so, it violated, among others, the rights of the Republic of Cyprus under articles 56 and 77 of the Convention, on the "Rights, jurisdiction and duties of the coastal State in the exclusive economic zone" and the "Rights of the coastal State over the continental shelf", which also reflect customary international law.

Moreover, the Republic of Turkey, through the actions of its warship against the MV *Flying Enterprise*, has infringed the right of a legal entity of a third country to carry out a survey for the purposes of laying a submarine cable within the EEZ and continental shelf of the Republic of Cyprus, pursuant to article 79 (1) of the Convention, as well as the Republic of Cyprus' right, in authorizing such surveys, to take reasonable measures for the exploration and exploitation of its EEZ/continental shelf (article 79 (2) of the Convention).

It is clear that Turkey's acts constitute a violation of international law and an infringement of the sovereign rights and jurisdiction of the Republic of Cyprus in its EEZ and over its continental shelf, as provided for by the Convention, relevant customary international law and Cypriot domestic law.

The Government of the Republic of Cyprus calls once again on the Government of the Republic of Turkey to respect the principles of international law on the peaceful use of the seas.

I should appreciate if you would have the present letter and its annex circulated as a document of the General Assembly, under agenda items 44 and 79 (a), and of the Security Council, and have it published in the next Law of the Sea Bulletin.

(*Signed*) Nicholas **Emiliou**

Revitalization of the work of the General Assembly

Security Council
Seventy-first year

Letter dated 29 February 2016 from the Permanent Representative of Portugal to the United Nations addressed to the President of the General Assembly and the President of the Security Council

Regarding the joint letter of the President of the General Assembly and the President of the Security Council dated 15 December 2015 (A/70/623-S/2015/988), I have the honour to send herewith a letter from the Prime Minister of the Portuguese Republic presenting the candidature of Mr. António Guterres for the position of Secretary-General of the United Nations (see annex).

I request that you kindly circulate this letter and its annex as a document of the General Assembly, under agenda item 120, and of the Security Council.

Annex to the letter dated 29 February 2016 from the Permanent Representative of Portugal to the United Nations addressed to the President of the General Assembly and the President of the Security Council

Letter dated 29 February 2016 from the Prime Minister of Portugal addressed to the President of the General Assembly and the President of the Security Council

The Government of Portugal thanks you for your letter of 15 December 2015 concerning the selection and appointment of the next Secretary-General of the United Nations and wishes to contribute to this vital endeavour.

Portugal fully agrees that the position of Secretary-General is of the greatest importance, requiring the highest standards of efficiency, competence and integrity, as well as a firm commitment to the purposes and principles of the Charter of the United Nations. We also agree that it is indispensable for candidates to have previously demonstrated leadership and managerial abilities as well as an extensive experience in international relations and strong diplomatic, communication and multilingual skills.

It is for these reasons that Portugal wishes to present the candidature of Mr. António Guterres for the position of Secretary-General of the United Nations. The presentation of this candidature is based on the firm conviction that Mr. Guterres fully meets all of these criteria and that his experience, notably as Prime Minister of Portugal (1995-2002) and then as the United Nations High Commissioner for Refugees (2005-2015), a responsibility that he bore for two consecutive terms of office, render him particularly well suited for the unique responsibilities of Secretary-General. Allow me to draw particular attention to his work as High Commissioner and the ability — widely recognized — that he demonstrated in dealing with critical and challenging problems threatening world peace and security, undermining the safeguarding of human rights and compromising sustainable development. Throughout his tenure he showed exemplary understanding of and respect for the values of the United Nations, and extensive international experience which is highly relevant to the pursuit of the Organization's objectives.

During the ten and a half years of his mandate as United Nations High Commissioner for Refugees he maintained excellent cooperation with Member States and developed strong partnerships with civil society and the private sector. At the same time, the Office of the High Commissioner went through a period of continuous and intense reform and innovation, allowing it to triple its annual activities, increase its efficiency in delivery and coordination, and reduce to an unprecedented extent the burden of its structural and administrative costs, thus placing the focus of its resources on people in need. Throughout the mandate of Mr. Guterres, the organization gave special attention to the protection and empowerment of women and girls, as well as to the promotion of gender parity in its workforce.

In presenting this candidature, the Government of Portugal is also mindful of the other aspects referred to in your joint letter, specifically the opportunities that

will be offered to the candidates for interaction with members of the General Assembly and of the Security Council, which we very much welcome.

Let me assure you that the presentation of this candidature is also motivated by Portugal's desire to contribute to the process of selecting the next Secretary-General, enriching the choice offered to the relevant United Nations bodies and ensuring a swift and smooth appointment of the future incumbent, through the presentation of an outstandingly capable and experienced individual who has repeatedly demonstrated his leadership and commitment to the objectives of the United Nations and to effective multilateralism.

(*Signed*) António **Costa**
Prime Minister

Enclosure

António Manuel de Oliveira Guterres

António Guterres served as United Nations High Commissioner for Refugees from June 2005 to December 2015, heading one of the world's foremost humanitarian organizations with nearly 10,000 staff working in 125 countries.

During his tenure, he oversaw a profound structural reform of the Office of the United Nations High Commissioner for Refugees (UNHCR), reducing staff in its Geneva headquarters by over 20 per cent and increasing the organization's cost effectiveness and emergency response capacity. The volume of activities of UNHCR tripled during his time in office, following the introduction of a needs-based budgeting approach and an increase in the number of people displaced by conflict and persecution, from 38 million in 2005 to over 60 million in 2015. The tenure of Mr. Guterres was marked by some of the largest displacement crises in decades, particularly conflicts in Syria and Iraq, but also the crises in South Sudan, the Central African Republic or Yemen.

Before joining UNHCR, Mr. Guterres spent more than 20 years in government and public service. He served as prime minister of Portugal from 1995 to 2002, during which time he was heavily involved in the international effort to resolve the crisis in East Timor. As president of the European Council early in 2000, he led the adoption of the "Lisbon Agenda" and co-chaired the first European Union-Africa summit. He was a member of the Portuguese Council of State from 1991 to 2002. Mr. Guterres was elected to the Portuguese Parliament in 1976, where he served as a member for 17 years. During that time, he chaired the Parliamentary Committee for Economy, Finance and Planning, and later the Parliamentary Committee for Territorial Administration, Municipalities and Environment. He was also leader of his party's parliamentary group. From 1981 to 1983, Mr. Guterres was a member of the Parliamentary Assembly of the Council of Europe, during which time he was also elected as chairman of the Committee on Demography, Migration and Refugees.

For many years Mr. Guterres was active in the Socialist International, a worldwide organization of social democratic political parties. He was the group's vice-president from 1992 to 1999, co-chairing the African Committee and later the Development Committee. He served as President of the Socialist International from 1999 until mid-2005. In addition, he founded the Portuguese Refugee Council as well as the Portuguese Consumers Association, DECO, and served as president of the Centro de Acção Social Universitário, an association carrying out social development projects in poor neighbourhoods of Lisbon, in the early 1970s.

Mr. Guterres is a member of the Club of Madrid, a leadership alliance of democratic former presidents and prime ministers from around the world.

Mr. Guterres was born in Lisbon in 1949 and graduated from the Instituto Superior Técnico with a degree in engineering. He is fluent in Portuguese, English, French and Spanish.

Protracted conflicts in the GUAM area and their implications for international peace, security and development

The situation in the occupied territories of Azerbaijan

Letter dated 29 February 2016 from the Permanent Representative of Azerbaijan to the United Nations addressed to the Secretary-General

Upon instructions from my Government, I have the honour to convey herewith the records of the violations of the ceasefire by the Republic of Armenia in January 2016 (see annex).* During the reporting period, Armenia violated the ceasefire regime 3,202 times and continued the usage of large-calibre guns and heavy weaponry from its positions in the occupied territories of the Republic of Azerbaijan and from its own territory.

As a result, one serviceman of the armed forces of the Republic of Azerbaijan was killed and two servicemen were wounded.

The continuous occupation of a large part of the territory of the Republic of Azerbaijan by the armed forces of Armenia remains the main obstacle to the settlement of the conflict and the only source of the escalation of the situation on the front line and of occurrences of hostilities and casualties.

To materialize its numerous statements on its "unequivocal commitment to the peaceful settlement of the conflict", Armenia should immediately put an end to its annexationist policy and withdraw all its troops from the occupied territories of the Republic of Azerbaijan.

I should be grateful if you would have the present letter and its annex circulated as a document of the General Assembly, under agenda items 35 and 40, and of the Security Council.

specific operational matters and/or initiatives.[1] **The Advisory Committee is of the opinion that progress has been made in establishing structures and systems which, if utilized in the manner intended, can provide management and the governing bodies elements for a viable accountability framework. The Committee is also of the view, however, that additional practical measures should be introduced to ensure that the different elements lead to progress with respect to ensuring improved institutional and personal accountability in the future.**

3. In his fifth progress report, the Secretary-General provides an overview of the various aspects of the accountability framework under the main headings of "Performance and results", "Stewardship of resources" and "Compliance", as well as an overview of "enablers", in which he describes the role of the International Public Sector Accounting Standards (IPSAS) and the enterprise resource management system (Umoja). In the light of the Committee's observation in the paragraph above, its report is organized around the underlying concepts contained in the framework, with a view to strengthening their application. Observations and recommendations have therefore been made under the following headings: (a) monitoring and oversight mechanisms; (b) measuring organizational activities and processes; (c) evaluating outcomes; and (d) operationalizing and enforcing a credible personal and institutional accountability framework.

A. Monitoring and oversight mechanisms

4. The Advisory Committee notes that the mechanism available for monitoring and documenting the activities of the Organization includes the so-called enablers, namely, the recently implemented Umoja and IPSAS, as well as a number of other tools, such as the work performed by external and internal oversight bodies, the forthcoming anti-fraud framework and such internal monitoring mechanisms as the Headquarters Committee on Contracts. In addition, legislative guidance is provided by Member States, specifically through resolutions of the General Assembly.

External and internal oversight

5. The Advisory Committee notes from the report of the Secretary-General that, since 2010, of a total of 923 high-risk or critical recommendations issued by the external and internal oversight bodies, 818 had been closed and implemented and 105 were in progress as at 30 November 2015 (see A/70/668, tables 1 and 2). In the report, it is indicated that the overall number of recommendations under review or under implementation has decreased; some of those that remain outstanding, however, pertain to matters directly related to the accountability of management and staff in conducting their day-to-day work efficiently and effectively. This includes recommendations pertaining to the implementation challenges of the enterprise risk

[1] These include the Committee's previous report on accountability (A/68/783; A/67/776; A/66/738; A/64/683; A/63/457; A/60/418); activities of the Ethics Office (A/69/332; A/68/348; A/67/306); special measures for protection from sexual exploitation and sexual abuse (A/69/839; A/67/780; A/66/718); global field support strategy (A/69/874; A/68/782; A/67/780); global service delivery model (A/70/436); human resources management (A/70/765; A/70/718; A/69/572; A/68/523); Board of Auditors (A/70/380; A/69/386; A/68/381); Board of Auditors on information and communications technology (A/70/755); enterprise resource planning project (A/70/7/Add.19; A/69/418; A/68/7/Add.7; A/67/565); procurement activities (A/69/809; A/67/801; A/64/501).

management system; the development of key lessons identified in business transformation projects; the development of a skills strategy for staff; the optimization of prompt payment discount rates during contract negotiations; the development of the modules and the associated procurement strategy within the global field support strategy; and the identification of deficiencies in acquisition planning and global asset management (ibid., para. 62). In that connection, the Committee recalls the observation of the Board of Auditors, in its most recent report on the United Nations peacekeeping operations, that the implementation rate for audit recommendations falls significantly in instances where prior recommendations that were closed but in fact not implemented are excluded (see A/70/5 (Vol. II), paras. 9-10). The Committee intends to further address the aforementioned matter in its forthcoming report on the subject.

6. **The Advisory Committee reiterates that the full and timely implementation of the recommendations of oversight bodies is an essential part of any effective system of accountability (see A/69/802, para. 15). Furthermore, the Committee stresses the indispensable roles of external and internal oversight mechanisms, which are carried out through regular audit reviews and the issuance of pertinent recommendations, which often highlight operational deficiencies and are aimed at strengthening the performance of managers in monitoring the activities for which they are held accountable.**

Anti-fraud framework

7. The Advisory Committee notes that an essential aspect of monitoring organizational activity in an effective manner must include proper guidance pertaining to the prevention, identification and handling of fraud and corruption, including a clearly defined policy for the protection of whistle-blowers. In paragraphs 52 to 56 of his report, the Secretary-General explains that the preparation of an anti-fraud framework is under way and is expected to be operationalized in April 2016. This framework is expected to reiterate the zero-tolerance approach to all fraudulent acts, with a full commitment to pursuing all credible allegations and ensuring that appropriate administrative/disciplinary measures are applied when the allegations are substantiated, including the referral of cases to national authorities when appropriate, and that contractual remedies are put into place to ensure recovery in such instances. The framework will also include a definition of fraud and corruption as applicable to the Secretariat.

8. Upon enquiry, the Advisory Committee was informed that an agreed-upon definition of fraud and corruption was pending finalization. It was envisaged that the anti-fraud framework would be finalized on 1 April 2016.

9. **The Advisory Committee emphasizes that an effective anti-fraud framework must provide clearly prescribed parameters to identify "red flags" or possible operational irregularities which, if necessary, trigger appropriate corrective action (see also paras. 27-30 below).**

10. **With respect to the framework's definition of fraud and corruption, the Advisory Committee reiterates its view that a single agreed definition, across the United Nations system, of what constitutes fraud, as well as cases of suspected or presumptive fraud, is essential in order to develop effective counter-fraud policies to ensure compatibility and comparability of related data across entities and to improve overall transparency. The Committee also**

reiterates that, in its opinion, the United Nations Chief Executives Board for Coordination (CEB) would be best placed to develop such guidance so as to achieve consistent application across all organizations of the United Nations system (see A/70/380, para. 30) and stresses again its recommendation that the General Assembly invite the Secretary-General, in his capacity as chair of CEB, to initiate this process.

11. **The Advisory Committee requests that the Secretary-General provide a status update on the development of the aforementioned anti-fraud framework to the General Assembly at the time of its consideration of the present report.**

12. The Advisory Committee was furthermore informed that a whistle-blower protection policy would be a component of the anti-fraud framework in order to ensure that staff members feel duly protected by the Organization in reporting allegations of fraud and corruption. In that connection, the Committee recalls that the Board of Auditors has commented extensively on this matter, (see A/69/5 (Vol. I), paras. 152-155) noting, inter alia, that while whistle-blowing arrangements are in place, the Administration does not have a complete picture of reported cases or how these have progressed, largely because it does not have a single point of entry for whistle-blowers to report wrongdoing. The Board also noted that the protection against retaliation policy was very often used as a staff grievance mechanism for work performance and interpersonal disputes, duplicating existing human resources management arrangements for handling such cases, and that it served to undermine the official staff appraisal system. The Board noted further that, in 2012-2013, the Administration had commissioned an external expert to review its existing protection against retaliation policy and was currently considering potential revisions. The Committee was informed, upon enquiry, that the review had been completed in 2014.

13. **The Advisory Committee notes with concern that the Secretary-General has not yet taken steps to refine and revise the policy against retaliation following the external expert review in 2014, for instance by incorporating the observations of the Board Auditors on this subject contained in its financial report and audited financial statements for the biennium ended 31 December 2013 (see A/69/5 (Vol. I)). Therefore, the Advisory Committee recommends that the General Assembly request the Secretary-General to finalize, without further delay, the revision of the policy against retaliation, which should be separate and distinct from mechanisms for handling staff grievances and interpersonal disputes, and provide protection for whistle-blowers.**

Headquarters Committee on Contracts

14. In paragraphs 76 to 81 of his report, the Secretary-General describes the work done by the Headquarters Committee on Contracts, which reviews proposed procurement awards above a certain financial threshold and advises the Assistant Secretary-General of the Office of Central Support Services in the Department of Management on whether the procurement process is in line with the Financial Regulations and Rules and conforms to the review criteria of best value for money; fairness, integrity and transparency; effective international competition; and the interest of the Organization.

15. The Advisory Committee was informed, upon enquiry, that the Headquarters Committee on Contracts database has the capability to generate statistics and enable

follow-up on the recommendations of the Headquarters Committee on Contracts. The Advisory Committee was also informed that the Secretariat was currently strengthening its monitoring and follow-up of recommendations, especially those with policy implications.

16. **The Advisory Committee notes that the process of monitoring and following up on the recommendations of the Headquarters Committee on Contracts is undergoing a review process aimed at strengthening its controls and monitoring capabilities and recommends that the General Assembly be provided with details concerning this exercise, including on the expected time frame for completion, at the time of its consideration of the fifth progress report on the accountability system in the United Nations Secretariat.**

Resolutions of the General Assembly

17. The Advisory Committee enquired as to the availability of a Secretariat-wide tracking mechanism to ensure that resolutions of the General Assembly, including those based on the Committee's recommendations relating to administrative and budgetary matters, endorsed by the Assembly, are implemented within the appropriate time frame. The Committee was informed, upon enquiry, that the implementation and follow-up with respect to General Assembly resolutions was continuously monitored and reported internally by the responsible offices/units to the head of department, as well as, where applicable, by the oversight bodies. Furthermore, the status of implementation on individual subjects is reported regularly to the General Assembly in relevant reports. Nevertheless, the Committee was informed that comprehensive statistics with respect to the monitoring of the implementation of General Assembly resolutions were not available.

18. **The Advisory Committee is of the view that monitoring the status of the implementation of General Assembly resolutions on administrative and budgetary matters and related operative provisions contained therein would be a useful accountability tool for Member States and the Organization alike. The Committee believes that the information currently contained within individual subject-specific reports of the Secretary-General relating to the implementation of the General Assembly provisions could therefore be reported periodically, in a consolidated manner, to the Assembly. Therefore, the Committee expects that a status update thereon will be provided in the context of the Secretary-General's sixth progress report on the accountability system.**

B. Measuring organizational activities and processes

19. With respect to measuring the overall efficiency of the Organization, the Secretary-General states, in paragraphs 4 to 15 of his report, that this is a complex matter for the United Nations, which has a wide variety of mandates and operations and does not produce tangible goods. The Secretary-General also indicates, with a view to the recent introduction of IPSAS and Umoja, that various approaches to measuring the efficiency exist, such as comparing inputs and outputs or costs and outputs; assessing efficiency at the results level or at the level of outputs and processes; or placing a focus on the administrative process under the umbrella of the global service delivery model, which is currently under development.

20. On a related matter, with respect to the global service delivery model, the Advisory Committee recalls its recommendation that any organizational changes to the existing service delivery model can be made only after approval by the General Assembly of a detailed proposal for a new service delivery model of the United Nations Secretariat and reiterates that it expects that a detailed proposal will be submitted at the main part of the seventy-first session of the General Assembly (see A/70/436, paras. 37 and 47).

21. The Advisory Committee enquired as to progress made in measuring the Organization's overall efficiency, effectiveness and related accountability tools and processes and was informed that systems reflecting proper segregation of duties and ensuring adequate checks and balances had been strengthened. Specific examples were provided in such areas as: (a) recruitment, where the central review bodies are responsible for monitoring the integrity of the process; (b) finance, where certifying and approving functions are separated; and (c) procurement, where the roles of the requisitioning officer and the procurement officer are separated. In addition, the roles of four oversight bodies, the Ethics Office and the United Nations Regulations and Rules Governing Programme Planning, the Programme Aspects of the Budget, the Monitoring of Implementation and the Methods of Evaluation (ST/SGB/2000/8) have been clearly articulated. Also, the recently introduced enterprise risk management system has resulted in the completion of a Secretariat-wide risk assessment exercise, with the implementation of mitigating measures now under way.

22. **The Advisory Committee stresses that a number of systems should have the capability to measure activities, such as the enterprise resource management system (Umoja) and IPSAS, which are set up to identify anomalies or inaccuracies, to produce timely management information and to determine trends. The Committee observes, however, that the details provided in the report of the Secretary-General with respect to measuring the efficiency of the Organization lack precision and operational applicability and do not present quantifiable data or describe in concrete terms which systems are in place to uniformly measure efficiency within the United Nations.**

23. **The Advisory Committee is of the view that further efforts are needed to define and measure the efficiency and effectiveness of the Organization in a tangible manner. The Committee therefore recommends that the General Assembly request the Secretary-General to develop a practical approach, based on clear and realistic indicators, aimed at presenting a comprehensive picture so as to improve the management and stewardship of the Organization.**

C. Evaluating outcomes

Self-evaluation pilot programme in the Department of Management

24. The Advisory Committee recalls that the Secretary-General, in connection with his fourth progress report on the accountability system, made reference to the implementation of a pilot for strengthening the self-evaluation capacity within the Department of Management to address the lack of resources for implementing a strong evaluation framework Secretariat-wide (see A/69/802, para. 9). In paragraph 21 of his present report, the Secretary-General indicates that the pilot was conducted within the Department of Management and has resulted in two completed evaluations. The first evaluation focused on the use of mobile devices and the

second on compliance with performance management requirements, while the third evaluation had not been completed owing to time and staff resource constraints. The Secretary-General also states that the two completed evaluations produced useful insight and information but were labour-intensive and time-consuming. He refers to the report of the Office of Internal Oversight Services (OIOS), in which it is stated that the evaluation capacity in the Secretariat in past years has been uneven and inadequate, specifically owing to a lack of dedicated personnel and resources, inadequate staff competencies and lack of evaluation culture (see A/70/72, paras. 27-35).

25. **The Advisory Committee considers that, given that evaluation staff expertise and capacity are available within the Organization, there is a need to make full use of the evaluation capacity and experience of OIOS to ensure that departmental self-evaluation exercises are performed regularly and professionally. The Committee recalls that the Secretary-General has presented specified resources, for the biennium 2016-2017, for monitoring and evaluation activities, covering mandatory self-assessments and discretionary self-evaluations.**

26. **The Advisory Committee recalls its recommendation, which was endorsed by the General Assembly in its resolution 70/249, that the Secretary-General undertake a comprehensive assessment of the impact of these activities on programme design and resource allocation across the different budget sections (see A/70/7, paras. 59-61). The Committee expects the inclusion in the first report on the proposed programme budget for the biennium 2018-2019.**

D. Operationalizing and enforcing a credible personal and institutional accountability framework

27. In paragraphs 22 to 35 of his report, under the heading "Risk treatment and response plan", the Secretary-General lists the corporate risk owners, at the senior management level, together with the various activities under their purview, and describes a so-called risk treatment plan.

28. The Advisory Committee notes that the aforementioned risk treatment and response plan lacks operational precision and does not, in fact, include a response plan that sets out measures to hold senior managers accountable for handling the risks associated with their respective areas of responsibility. This would, for example, include instances of general or specific mismanagement, such as the application of unrealistic budget assumptions[2] or the implementation of costly, but unsuccessful, management initiatives. Other examples that would include requirements for collaborative inter-agency or interdepartmental actions, such as in the implementation of the newly adopted information and communications strategy, are addressed in detail by the Committee in its report on the report of the Board of Auditors on progress in the handling of information and communications technology affairs in the Secretariat (A/70/755).

29. **The Advisory Committee is of the view that the necessary measures must be in place to link individual responsibilities with organizational activities, whether these pertain to day-to-day management tasks or broader institutional**

[2] The Advisory Committee intends to comment further on this matter in the context of its forthcoming report on the report of the Board of Auditors on United Nations peacekeeping operations (see A/70/5 (Vol. II), paras. 30-34).

change initiatives. The Committee is of the view that the credibility of the accountability framework rests on the ability of the Organization to operationalize and enforce remedial measures for staff and officials who have not adequately exercised their responsibilities. The Advisory Committee therefore recommends that the General Assembly request the Secretary-General to develop a clear, transparent and precise set of parameters, aimed at defining responsibility areas, particularly for senior managers, for non-compliance of these responsibility areas. The Committee looks forward to receiving concrete information thereon in the context of the Secretary-General's sixth progress report on the accountability framework.

30. In paragraphs 82 and 83, under the heading "Holding staff accountable for improper decisions", statistics are provided for the period from 1 July 2014 to 30 June 2015, during which a total of 60 disciplinary measures were imposed on 64 staff members. In this connection, with respect to the practice of the Secretary-General in disciplinary matters and cases of possible criminal behaviour, the Advisory Committee recalls, inter alia, that the revised administrative instruction on investigations and the disciplinary process had not yet been issued (see A/70/718, paras. 12-17).

III. Conclusion

31. The action to be taken by the General Assembly is set out in paragraph 91 of the report of the Secretary-General. **The Advisory Committee recommends that the Assembly take note of the fifth progress report of the Secretary-General on the accountability system in the United Nations Secretariat, subject to its observations and recommendations in the paragraphs above.**

United Nations A/70/771–S/2016/208

General Assembly
Seventieth session
Agenda item 37
The situation in the Middle East

Security Council
Seventy-first year

Identical letters dated 24 February 2016 from the Permanent Representative of Lebanon to the United Nations addressed to the Secretary-General and the President of the Security Council

On instructions from my Government, I transmit to you herewith a statistical summary of Israeli violations of Security Council resolution 1701 (2006) committed during the month of January 2016 (see annex).

I should be grateful if you would have the present letter and its annex circulated as a document of the seventieth session of the General Assembly, under agenda item 37, and of the Security Council.

(*Signed*) Nawaf **Salam**
Permanent Representative

Land violations

Date	*Time*	*Nature of violation*
1 January 2016	2315 2330	Inside the occupied Shab'a Farms, the Israeli enemy caused several explosions.
2 January 2016	1712 1725	From inside occupied Palestinian territory, the Israeli enemy fired three mortar shells, which landed approximately 200 metres south of the Blue Line opposite Bastrah farm.
4 January 2016	1515	Explosions were heard inside the occupied Shab'a Farms area, near the Israeli enemy position of Ruwaysat al-Qarn (N467), while the Israeli enemy directed rounds of gunfire, 115 artillery shells and seven mortar shells at Lebanese territory. The projectiles landed on the villages of Wazzani, Majidiyah, Abbasiyah, Bastrah, Halta and Mari. One hit the Lebanese Army Tallat Wazzani position. No one was injured. At the same time, enemy reconnaissance aircraft and helicopters circled in Lebanese airspace.
	2123	From inside occupied Palestinian territory, the Israeli enemy fired mortar shells, which landed approximately 180 metres south of the Blue Line opposite Bastrah farm.
6 January 2016	1530	Inside occupied Palestinian territory, an Israeli enemy patrol comprising a Hummer vehicle and a Defender vehicle approached the gate opposite the Lebanese Army Wazzani pumping station. Four soldiers stepped out and trained their individual weapons on the gate. At 1630 hours, the soldiers departed into occupied territory.
	1317	From inside occupied Palestinian territory, opposite Ra's al-Naqurah, an Israeli enemy Merkava tank pointed its cannon towards the Lebanese Army position at Ra's al-Naqurah.
9 January 2016	1740	From inside occupied Palestinian territory, near the Israeli enemy position of South Marwahin, two Humvee enemy vehicles approached and searchlights were directed from within them towards Lebanese territory near Marwahin.
	1815	From inside occupied Palestinian territory, opposite the Lebanese Army Udaysah checkpoint near point TP37, an Israeli enemy patrol comprising a Hummer vehicle and a Defender vehicle approached. The patrol inspected the technical fence and directed a searchlight towards the checkpoint. At 1900 hours, the patrol departed into occupied territory.

Date	*Time*	*Nature of violation*
13 January 2016	1245	Inside occupied Palestinian territory, opposite Kafr Killa at Tallat Riyaq, an Israeli enemy patrol comprising a four-wheel drive vehicle and two personnel carriers approached. Thirty soldiers stepped out, maps in hand, and took photographs of Lebanese territory. At 1315 hours, they departed into occupied territory.
	1330 1440	At the Birkat al-Naqqar locality, while an Israeli enemy patrol moved between the Ruwaysat al-Alam and Birkat al-Naqqar positions, its soldiers threw six smoke grenades at the side of the road inside the occupied Shab'a Farms.
15 January 2016	2230	From inside occupied Palestinian territory, the Israeli enemy directed a searchlight from its Labbunah-Jall al-Alam position towards Lebanese territory.
21 January 2016	1516 1654	Opposite Yarun, from its W423 position inside occupied Palestinian territory, the Israeli enemy directed a Merkava tank cannon towards position 50-6 belonging to the Finnish-Irish unit of the United Nations Interim Force in Lebanon (UNIFIL).
22 January 2016	0645	On the outskirts of Blida opposite the Lebanese Army post of Bi'r Shu'ayb, while an Israeli enemy patrol comprising two Defender vehicles and a Hummer vehicle was patrolling the technical fence, nine soldiers stepped out and directed insults at the observation post personnel. At 0715 hours, the patrol returned into occupied territory.
27 January 2016	1825	From its Tall al-Rahib position inside occupied territory, the Israeli enemy directed a searchlight towards Lebanese territory.
28 January 2016	1030	Opposite Udaysah, at point Shin 25 south of the Misgav Am settlement, the Israeli enemy released two balloons measuring two metres in diameter equipped with surveillance cameras. A patrol comprising two Hummer vehicles approached the site, and its soldiers trained their automatic vehicles on Lebanese territory. At 1700 hours, the enemy pulled down one of the balloons; the other remains aloft.
31 January 2016	1030	On the outskirts of Kafr Shuba-Bastara farm, some 70 people, accompanied by Deputy Qassim Hashim, attended a protest against the Israeli enemy's bulldozing of wooded land and altering the characteristics of the land. During the sit-in, an Israeli enemy patrol comprising a Merkava tank, four Defender vehicles and three Hummer vehicles approached. The tank trained its cannon on the protesters. An enemy patrol member addressed the protesters through a loudspeaker, telling them to leave and threatening to open fire if they failed to do so. The sit-in ended at 1130 hours.

Sea violations

Date	*Time*	*Nature of violation*
10 January 2016	1705	Opposite Ra's al-Naqurah, an Israeli enemy military launch violated the southern maritime boundary established by Decree 6433 (2011) of 1 October 2011, proceeding some 222 metres into Lebanese territorial waters over a four-minute period. The launch then left in the direction of occupied Palestinian waters.
12 January 2016	0330	Opposite Ra's al-Naqurah, inside occupied Palestinian territorial waters, an Israeli enemy military launch directed several rounds of medium-weapon fire towards Lebanese territorial waters.
13 January 2016	1054	Off Ra's al-Naqurah, an Israeli enemy military launch violated the southern maritime boundary established by Decree 6433 (2011), proceeding some 575 metres into Lebanese territorial waters over a 10-minute period before leaving in the direction of occupied Palestinian territorial waters.
14 January 2016	1845	From occupied Palestinian territory, at its position opposite Ra's al-Naqurah, the Israeli enemy directed a searchlight towards Lebanese territorial waters for a period of 30 seconds.
15 January 2016	0745	Opposite Ra's al-Naqurah, an Israeli enemy military launch violated the southern maritime boundary established by Decree 6433 (2011), proceeding some 120 metres into Lebanese territorial waters over a two-minute period before leaving in the direction of occupied Palestinian territorial waters.
	0750	Opposite Ra's al-Naqurah, an Israeli enemy military launch violated the southern maritime boundary established by Decree 6433 (2011), proceeding some 120 metres into Lebanese territorial waters over a two-minute period before leaving in the direction of occupied Palestinian territorial waters.
	0755	Opposite Ra's al-Naqurah, an Israeli enemy military launch violated the southern maritime boundary established by Decree 6433 (2011), proceeding some 170 metres into Lebanese territorial waters over a two-minute period before leaving in the direction of occupied Palestinian territorial waters.
	1633	Off Ra's al-Naqurah, an Israeli enemy military launch violated the southern maritime boundary established by Decree 6433 (2011), proceeding some 260 metres into Lebanese territorial waters over a two-minute period before leaving in the direction of occupied Palestinian territorial waters.
17 January 2016	0749	Opposite Ra's al-Naqurah, an Israeli enemy military launch violated the southern maritime boundary established by Decree 6433 (2011), proceeding some 240 metres into Lebanese territorial waters over a 65-minute period before leaving in the direction of occupied Palestinian territorial waters.

Date	*Time*	*Nature of violation*
	0757	Opposite Ra's al-Naqurah, an Israeli enemy military launch violated the southern maritime boundary established by Decree 6433 (2011), proceeding some 240 metres into Lebanese territorial waters over a 57-minute period before leaving in the direction of occupied Palestinian territorial waters.
	1045	Opposite Ra's al-Naqurah, an Israeli enemy military launch violated the southern maritime boundary established by Decree 6433 (2011), proceeding some 296 metres into Lebanese territorial waters over a 66-minute period before leaving in the direction of occupied Palestinian territorial waters.
	1130	Opposite Ra's al-Naqurah, an Israeli enemy military launch violated the southern maritime boundary established by Decree 6433 (2011), proceeding some 296 metres into Lebanese territorial waters over a 15-minute period before leaving in the direction of occupied Palestinian territorial waters.
22 January 2016	0740	Off Ra's al-Naqurah, an Israeli enemy military launch violated the southern maritime boundary established by Decree 6433 (2011), proceeding some 220 metres into Lebanese territorial waters over a three-minute period before leaving in the direction of occupied Palestinian territorial waters.
31 January 2016	1550	Off Ra's al-Naqurah, an Israeli enemy military launch violated the southern maritime boundary established by Decree 6433 (2011), proceeding some 400 metres into Lebanese territorial waters over a three-minute period before leaving in the direction of occupied Palestinian territorial waters.

Air violations

Date	*Time*	*Nature of violation*
4 January 2016	1113	An Israeli enemy helicopter violated Lebanese airspace. It circled over Lebanese territorial waters before leaving.
	1210	An Israeli enemy reconnaissance aircraft violated Lebanese territory, entering over Kafr Killa. It circled over the South and the Western Bekaa before leaving at 1515 hours over Rumaysh.
	1515	Israeli enemy helicopters and reconnaissance aircraft violated Lebanese airspace, circling over the South.
	1520	An Israeli enemy reconnaissance aircraft violated Lebanese territory, entering over Kafr Killa. It circled over the South and the Western Bekaa before leaving at 1515 hours over Rumaysh.

Date	*Time*	*Nature of violation*
5 January 2016	1030	Four Israeli enemy warplanes violated Lebanese airspace, entering over Alma al-Sha'b. They circled over all regions of Lebanon before leaving at 1150 hours over Rumaysh.
	2345	An Israeli enemy reconnaissance aircraft violated Lebanese territory, entering over Kafr Killa. It circled over the Western Bekaa and the South before leaving at 0445 hours on 6 January 2016 over Rumaysh.
6 January 2016	1045	An Israeli enemy reconnaissance aircraft violated Lebanese airspace, entering over Alma al-Sha'b. It circled over Beirut and its suburbs and the South before leaving at 1630 hours over Rumaysh.
7 January 2016	0815	An Israeli enemy reconnaissance aircraft violated Lebanese airspace, entering over Alma al-Sha'b, It circled over the South, Jubayl and Shikka before leaving at 1500 hours over Naqurah.
	2030	Four Israeli enemy warplanes violated Lebanese airspace, entering over Rumaysh. They circled over Beirut before leaving at 2055 hours over Rumaysh.
10 January 2016	0640	An Israeli enemy reconnaissance aircraft violated Lebanese territory, entering over Kafr Killa. It circled over Riyaq, Baalbek, Hirmil and the South before leaving at 1320 hours over Kafr Killa.
11 January 2016	0635	An Israeli enemy reconnaissance aircraft violated Lebanese airspace, entering over Naqurah. It circled over Iqlim al-Kharrub and the South before leaving at 1100 hours over Kafr Killa.
12 January 2016	0630	An Israeli enemy reconnaissance aircraft violated Lebanese airspace, entering over Kafr Killa. It circled over Riyaq, Baalbek and Hirmil before leaving at 1630 hours over Rumaysh.
	0925	An Israeli enemy reconnaissance aircraft violated Lebanese airspace, entering over Alma al-Sha'b, It circled over the South before leaving at 1600 hours over Rumaysh.
	1105	Two Israeli enemy warplanes violated Lebanese airspace, entering over Kafr Killa. They circled over all regions of Lebanon before leaving at 1240 hours over Alma al Sha'b.
13 January 2016	0615	An Israeli enemy reconnaissance aircraft violated Lebanese airspace, entering over Alma al-Sha'b. It circled over the South, Riyaq, Baalbek, Hirmil and Beirut and its suburbs before leaving at 1525 hours over the west of Naqurah.
	0630	An Israeli enemy reconnaissance aircraft violated Lebanese territory, entering over Kafr Killa. It circled over the Western Bekaa, the South, Riyaq, Baalbek and Hirmil before leaving at 1700 hours over Kafr Killa.

Date	*Time*	*Nature of violation*
	1115	Two Israeli enemy warplanes violated Lebanese airspace, entering over Kafr Killa. They circled over all regions of Lebanon before leaving at 1330 hours over Alma al Sha'b.
	1225	A small balloon drifted in from occupied Palestinian territory, appearing over Dayr Mimas. It then disappeared from view as it headed west.
	1330	An Israeli enemy reconnaissance aircraft violated Lebanese airspace, entering over Rumaysh. It circled over Riyaq, Baalbek and Hirmil before leaving at 2320 hours over Alma al-Sha'b.
	1335	An Israeli enemy reconnaissance aircraft violated Lebanese airspace, entering over Naqurah. It circled over Beirut and its suburbs before leaving at 0250 hours on 14 January 2016 over Alma al-Sha'b.
	1355	An Israeli enemy reconnaissance aircraft violated Lebanese airspace, entering over Alma al-Sha'b. It circled over the South before leaving at 1910 hours over Alma al-Sha'b.
16 January 2016	0910	An Israeli enemy reconnaissance aircraft violated Lebanese airspace, entering over Alma al-Sha'b. It circled over Riyaq, Baalbek, Hirmil and Beirut and its suburbs before leaving at 2200 hours over Naqurah.
	1255	An Israeli enemy reconnaissance aircraft violated Lebanese airspace, entering over Naqurah. It circled over Iqlim al-Kharrub, the South and the Western Bekaa before leaving at 1740 hours over Kafr Killa.
17 January 2016	0820	An Israeli enemy reconnaissance aircraft violated Lebanese airspace, entering over Kafr Killa. It circled over Riyaq, Baalbek, Hirmil and Akkar before leaving at 1610 hours over Alma al-Sha'b.
20 January 2016	0815	Two Israeli enemy warplanes violated Lebanese airspace, entering over Kafr Killa. They circled over all regions of Lebanon before leaving at 1005 hours over Alma al-Sha'b.
21 January 2016	0545	An Israeli enemy reconnaissance aircraft violated Lebanese airspace, entering over Kafr Killa. It circled over Riyaq, Baalbek, Hirmil and Akkar before leaving at 1500 hours over Alma al-Sha'b.
22 January 2016	0600	An Israeli enemy reconnaissance aircraft violated Lebanese airspace, entering over Kafr Killa. It circled over the South and the Western Bekaa before leaving at 1300 hours over Alma al-Sha'b.
23 January 2016	0830	Two Israeli enemy warplanes violated Lebanese airspace, entering over Kafr Killa, They circled over all regions of Lebanon before leaving at 1010 hours over Naqurah.
	1415	Two Israeli enemy warplanes violated Lebanese airspace, entering over Kafr Killa. They circled over all regions of Lebanon before leaving at 1615 hours over the sea west of Naqurah.

Date	*Time*	*Nature of violation*
	1850	Two Israeli enemy warplanes violated Lebanese airspace, entering over the sea off Shikka. They circled over Shikka, Al-Arz and Jubayl before leaving at 2000 hours over the sea west of Naqurah.
24 January 2016	1620	Two Israeli enemy warplanes violated Lebanese airspace, entering over Kafr Killa. They circled over all regions of Lebanon before leaving at 1715 hours over the sea west of Naqurah.
	1840	Two Israeli enemy warplanes violated Lebanese airspace, entering over the sea off Shikka. They circled over all regions of Lebanon before leaving at 2025 hours over the sea west of Naqurah.
25 January 2016	1215	Two Israeli enemy warplanes violated Lebanese airspace, entering over Kafr Killa. They circled over all regions of Lebanon before leaving at 1400 hours over Alma al-Sha'b.
28 January 2016	0620	An Israeli enemy reconnaissance aircraft violated Lebanese airspace, entering over Alma al-Sha'b. It circled over the Western Bekaa, the South, Zahlah, Riyaq and Beirut and its suburbs before leaving at 1520 hours over Naqurah.
	0920	Two Israeli enemy warplanes violated Lebanese airspace, entering over Alma al-Sha'b. They circled over all regions of Lebanon before leaving at 1110 hours over Aytarun.
	0925	An Israeli enemy reconnaissance aircraft violated Lebanese airspace, entering over the occupied Shab'a Farms, It circled over the South and the Western Bekaa before leaving at 1750 hours over Rumaysh.
31 January 2016	1040	Two Israeli enemy warplanes violated Lebanese airspace, entering over Kafr Killa. They circled over all regions of Lebanon before leaving at 1300 hours over the sea west of Naqurah.

United Nations

A/70/772

General Assembly

Distr.: General
4 March 2016

Original: English

Seventieth session
Agenda item 146
Financing of the International Residual Mechanism for Criminal Tribunals

Construction of a new facility for the International Residual Mechanism for Criminal Tribunals, Arusha branch

Report of the Advisory Committee on Administrative and Budgetary Questions

I. Introduction

1. The Advisory Committee on Administrative and Budgetary Questions has considered the report of the Secretary-General on the construction of a new facility for the International Residual Mechanism for Criminal Tribunals, Arusha branch (A/70/698). During its consideration of the report, the Advisory Committee met with representatives of the Secretary-General, who provided additional information and clarification, concluding with written responses received on 23 February 2016.

2. The report of the Secretary-General was submitted pursuant to General Assembly resolution 69/276, in paragraph 13 of which the Assembly requested the Secretary-General to submit to the Assembly, at the first part of its resumed seventieth session, a progress report on the implementation of the project, outlining, inter alia, the project expenditures and total costs.

II. Progress update and project schedule

3. The report of the Secretary-General on the construction of a new facility for the Mechanism, Arusha branch (A/70/698) is the fifth progress report on the project. Information with respect to the background of the project and the related resolutions of the General Assembly on the project is contained in paragraphs 1 to 3 of the report of the Secretary-General.

Cooperation with the host country

4. The Secretary-General reports that the progress made in the project was facilitated by the continued close cooperation with and support provided by the

Please recycle

United Republic of Tanzania, in accordance with the Supplementary Agreement to the Agreement between the United Nations and the United Republic of Tanzania concerning the Headquarters of the International Residual Mechanism for Criminal Tribunals, for the Premises of the Mechanism, of 5 February 2014 (ibid., para. 23).

5. During the reporting period, the host country completed the construction of a temporary access road to the site and installed power and water lines, at no cost to the United Nations. The Secretary-General looks forward to the completion of the ongoing works for the permanent access road and the connection to electricity, water and the Internet to be provided by the Government. Furthermore, the Secretary-General states that the exemption of the contractor and consultants from value added tax and import duties has proceeded smoothly (ibid., para. 24 and 26). Upon request, the Advisory Committee was provided with the table below showing the works undertaken by the host country and the status of progress.

Works by the host Government	*Status*
Temporary access road	Completed
Permanent access road	Ongoing (at final stage)
Water supply and connection	Completed
Power supply and connection	Ongoing (at final stage)
Internet services and connection	Ongoing

6. **The Advisory Committee reiterates its appreciation to the Government of the United Republic of Tanzania for its provision of land, access roads and the connection of water, electricity and Internet services to the new facility at no cost to the United Nations. The Committee trusts that the continued cooperation between the United Nations and the Government will be maintained through all phases of the project (A/69/788, para. 5).**

Project schedule

7. The Advisory Committee recalls that as requested by the General Assembly in its resolution 66/240 B, the project duration had been shortened from the initially estimated five years and three months to four years, and that occupancy of the facility was projected for the fourth quarter of 2015 (A/67/768, para. 15). However, owing to delays experienced, the date for the completion of the construction and occupancy was subsequently postponed from late in 2015 to early in 2016 as reflected in the previous progress report of the Secretary-General (see A/69/734, annex II, also A/69/788, para. 17).

8. In his current report, the Secretary-General indicates that construction works started on 27 February 2015, with the contractual requirement that they be concluded within 12 months by 28 February 2016. However, the project has since experienced further delays owing mainly to: (a) an error in the architectural drawings (topographical level disparity between the actual grounds and the architectural drawings), which led to a suspension of the excavation and earthworks for the archives and court buildings from 20 March to 27 April 2015 and consequently to a 38-day delay; and (b) site management turnover (specifically the

change of the site manager twice in a four-month period), resulting in some quality control issues and consequent slower-than-expected progress of the project (A/70/698, paras. 45-48).

9. According to the Secretary-General, mitigation measures have been undertaken by the contractor, including the recruitment of additional manpower, the extension of working hours on site, the assignment of the contractor's most senior project manager full time to the project and the exercise of value engineering. Consequently, according to the Secretary-General, the quality control issues have since been rectified and the construction works have progressed steadily, although the time lost has not been recovered (A/70/698, paras. 46-49).

10. The Secretary-General indicates that value engineering was undertaken in an effort to seek efficiencies pursuant to General Assembly resolution 69/276 and as one of the mitigation measures (ibid., paras. 38 and 49 (d)). It is indicated that an alternative heating, ventilation and air-conditioning system results in a 33 per cent shorter procurement lead time compared with the original manufacturer, while also offering additional advantages and efficiencies to the project (ibid.). The Advisory Committee was informed upon enquiry that the new system is more energy efficient, with a Class "A" energy efficiency rating over the "D" Class energy efficiency rating of the original system planned, and that the new system includes better aftersale support service. **The Advisory Committee notes the expected benefits to be derived from the new heating, ventilation and air-conditioning system as a result of the value engineering exercise. The Committee is of the view that best options should have been selected at the earliest possible stages of the project and that lessons learned in this exercise should be applied to future construction projects of the Organization.**

11. The Secretary-General indicates that consequent to the recent delays experienced, a revised programme of work was developed by the contractor with the target of completing the superstructure of the three main buildings by mid-February 2016. The project team, in close coordination with the Office of Central Support Services, identified further mitigation measures, such as the consideration of planning for sectional completion pursuant to the construction contract, which would allow the United Nations to occupy and use part of the facilities while the remaining construction works are ongoing for other parts of the premises (ibid., paras. 49 (a) and 51). A revised project schedule is presented in annex II to the report of the Secretary-General. **The Advisory Committee trusts that the Secretary-General will provide to the General Assembly information on the latest progress in the construction at the time of its consideration of the fifth progress report of the Secretary-General (A/70/698).**

12. Furthermore, the Secretary-General indicates in paragraph 50 of his report that the contractual completion date currently remains 6 April 2016 (see paras. 17 and 18 below on contract amendments); however, he also indicates that the observations on the ground would suggest the anticipated completion of works by May 2016 (ibid.). He further states that the project is still subject to risks that could also affect the schedule, including: an inclement early rainy season; possible delays in the shipment and delivery of long lead time material; any problems with the execution of the contractual drawings requiring remedial works; and any problems in communication between the contractor and the consultants. Upon enquiry, the

Advisory Committee was informed that the Secretariat remained cautiously optimistic that construction would reach substantial completion in May 2016.

13. **The Advisory Committee notes that the further delays experienced in the construction works so far were due to two factors: the 38-day delay due to the topographical error by the architectural consultants and the further delay beyond the 38-days due to the quality control issues by the construction contractor. The Committee is concerned that the project has experienced further delays and that its completion remains subject to further risks and potential delays. The Committee recalls that the General Assembly requested the Secretary-General to continue to take all measures necessary to mitigate potential risks and to ensure that the construction project is monitored closely and is completed within the approved timeline and resources (General Assembly resolution 69/276, para. 8). The Committee reiterates that accountability is key to the successful management of any organization (A/70/755, para. 28).**

III. Project expenditures, contract amendments and contingency provision

14. The total resources approved by the General Assembly for the project amounts to $8,787,733, comprising the estimated project cost of $7,737,362 and the contingency provision of $1,050,371. Total project expenditure until the completion of the project is currently projected at $8,053,058, representing the full utilization of the base project budget of $7,737,362, as well as $315,696 against the contingency provision. Information on the actual expenditures from 2013 to 2015, projected requirements for 2016 and the amounts charged against the contingency provision is provided in two tables in the report of the Secretary-General (A/70/698, paras. 53, 54 and tables).

15. In paragraph 10 of its resolution 69/276, the General Assembly noted with concern the higher-than-budgeted amount awarded for the architectural and engineering consultancy services as well as the construction contracts, and in this regard requested the Secretary-General to make every effort to seek efficiencies throughout the implementation of the project and to report thereon in the context of future progress reports. The Secretary-General reports that pursuant to the request made by the Assembly, cost overruns were first offset from project savings before being charged to the contingency provision. The Advisory Committee notes from the report of the Secretary-General that while the total overexpenditures amount to $427,623, an underexpenditure of $111,927 is projected under project supervision and management (related to the provision for the recruitment of a project manager). The underexpenditure of $111,927 would cover the cost overruns under travel (the full amount of $27,563) and under architect fees ($84,364 of $148,636). The remaining cost overruns of $315,696 are charged against the project contingency provision ($64,272 under architect fees and $251,424 under construction contract) (A/70/698, paras. 55, 56 and tables). Upon enquiry, the Advisory Committee was informed that the amount of $315,696 currently charged to the contingency provision was exclusive of the provisional additional services that might be included in the ongoing negotiation of an amendment to the architectural contract (see para. 19 below).

Architectural and construction contracts

16. The Advisory Committee recalls that the architectural services contract was concluded on 26 February 2014 and that the Committee discussed the issues related to the higher-than-budgeted contract in its previous report (A/69/788, paras. 7, 8, 27 and 29). The Secretary-General states that during the construction phase, the architectural consultants provide construction administration and site supervision services (A/70/698, para. 14). The Advisory Committee notes that the construction contract was concluded on 19 February 2015 (ibid., para. 9; see paras. 29-31, and annex below). Considering that the project has experienced further delays due to issues attributable to both the architectural consultants and the construction contractor (see para. 8 above), the Advisory Committee sought information and clarifications with respect to the impact and causal effects of the two delays on both contracts, including the potential costs of the contract amendments, as well as the direct and indirect costs of the delays.

17. The Secretary-General reports that the error in the architectural drawings, which caused 38-day delay, resulted in a no-cost amendment to the contract (A/70/698, para. 17). Upon clarification, the Advisory Committee was informed that the delay of 38 days caused by the architectural consultants had resulted in an extension of the construction contract from 28 February to 6 April 2016. Concerning the impact of the further delay beyond the 38 days caused by the construction contractor, the Advisory Committee notes that the Secretary-General does not provide information on whether the Organization intends to have negotiations with the construction contractor on a potential extension of the construction contract beyond 6 April 2016 and how additional costs, if any, would be covered (see paras. 21 and 22 below). **The Advisory Committee trusts that the Secretary-General will provide clarifications related to the potential extension of the construction contract to the Assembly in the context of its consideration of the fifth progress report of the Secretary-General (A/70/698).**

18. As for an amendment to the architectural services contract, the Secretary-General indicates that at the time of the writing of his report, the project team was in negotiation with the architectural consultant for a contract amendment for any provisional additional services that might be required as a result of the longer-than-scheduled duration of construction. The project team fully expects that any such amendment can be executed well within available budgetary resources while leaving adequate remaining contingency to cover any additional risk (A/70/698, para. 58). Upon clarification, it was confirmed to the Advisory Committee that the architects were responsible for the topographical error. The contract with the architects contains provisions that enable the Organization to oblige the architects to remedy errors in its performance of its services under the contract. The Committee was informed that the extension of the architectural services contract until 6 April was being negotiated to be at no cost to the United Nations. It was indicated to the Committee that the architects should agree to extend, at no additional charge, the duration of its services for the same number of days that the project was delayed as a result of their error. **The Advisory Committee notes that while the error made by the architects caused suspension of the project during March and April 2015, the Secretariat has negotiated an amendment to the construction contract and that an amendment to the architectural contract is still under negotiation. The Advisory Committee trusts that the Secretary-General will provide to the General Assembly the most up-to-date information on the ongoing negotiation**

of an amendment to the architectural services contract at the time of its consideration of the fifth progress report of the Secretary-General (A/70/698).

19. The Advisory Committee was informed upon enquiry that the provisional additional services indicated in paragraph 18 above may be required either to expedite completion of the project through additional site inspections or to further retain the architects' services in the event that there would be delays in the contractual completion. As the additional services were provisional in nature, the Mechanism was only planning for the possibility of requiring them and might not utilize them. The Committee was also informed that if these additional services did become necessary, the Mechanism would use existing resources from other budget lines before resorting to contingency fund. **In this connection, the Advisory Committee notes that the full utilization of the base project budget is currently forecasted already** (see para. 14 above and para. 22 below).

20. Concerning direct and indirect costs arising from the 38-day delay in the construction works due to the topographical error by the architectural consultants, the Advisory Committee was informed upon enquiry that:

(a) The direct costs attributable to the error were approximately (i) $30,000 for additional required civil works which was entirely offset by value engineering; and (ii) $11,000 for the extension of the architects services to the contractual completion date, which is being negotiated at no extra charge to the Organization. The Advisory Committee notes that the Secretariat did not specify whether the completion date refers to the current construction completion date of 6 April 2016 or beyond (see also para. 22 below);

(b) The indirect costs of approximately $38,000 for the extended stay at the current premises can be absorbed within the budget, which included a provision for rent for swing space. The Mechanism, and the ICTR Liquidation Team which is co-located with the Mechanism, will continue to operate from the currently leased premises in the Arusha International Conference Centre with no negative impact on the operations and mandate of both institutions.

21. **The Advisory Committee recommends that the General Assembly request the Secretary-General to make every effort to claim and enforce full compensation from the architects for all direct and indirect costs resulting from the topographical error. The Committee is furthermore of the view that as a matter of principle, compensation should be sought from contractors for costs resulting from errors or contractual non-compliance on their part rather than absorbing such costs within the project budget, drawing on the contingency or offsetting them through value engineering.**

22. The Advisory Committee was informed upon enquiry that according to the Secretariat, thus far, the challenges associated with the construction contractor had not entailed any direct or indirect costs to the United Nations. However, any delay that such challenges may cause to the contractual completion date of 6 April 2016 may be imputable to the contractor under the delay damages clause included in the construction contract. The Advisory Committee enquired as to why the construction contractor would not compensate for the loss in time and pay for the related additional services required of the architectural contractor given that the further delay was caused by the former. The Committee was informed that the construction contract provides that the contractor shall reimburse the United Nations for any

additional fees payable by the Organization to the consultants it has engaged arising out of or connected to the contractor's failure to complete the works within the time for completion. **In the light of this clarification, the Advisory Committee is of the view that any additional fees payable by the Organization to the architectural consultants arising from the failure of the construction contractor to complete the works within the timeline should be reimbursed by the construction contractor in accordance with the contract provisions. In addition, the Committee questions the assumption by the Secretariat that the further delay by the construction contractor has no indirect costs to the Organization, since the delay may prolong the stay of the Mechanism in the current premises with additional rental costs (see para. 20 (b) above).**

23. **The Advisory Committee is of the view that the Secretary-General has not provided clear, transparent and consistent information related to the direct and indirect costs arising from the errors made by the contractors, the obligations of the contractors for remedy and compensation, and the actions required of the Organization to pursue mitigation measures with the contractors, in particular in negotiations to amend the contracts involved. The Committee recommends that the General Assembly request the Secretary-General to provide information on non-compliance by contractors of current and future capital projects in his respective progress reports. The Committee is of the view that such information should include related additional resource requirements and compensations matters in a consistent and transparent manner.**

Project contingency provisions

24. The Advisory Committee recalls that in the context of the construction of a new facility for the Mechanism, the General Assembly has emphasized that contingency provisions approved for construction projects serve to provide necessary safeguards against unforeseen cost overruns during project implementation, and in this regard requests the Secretary-General to ensure that, in the future, any cost overruns are first met from compensatory reductions identified elsewhere through efficiencies in order to obviate to the extent possible the need for drawdown from contingency provisions (General Assembly resolution 69/276, paras. 8 and 9).

25. The Advisory Committee requested clarification concerning the Secretariat's interpretation that contingency provisions are part of the approved project budget and are separated from the base project cost for presentation purposes only. The Committee was informed, inter alia, that in the context of the recent reports of the Secretary-General on the renovation of the Africa Hall in Addis Ababa and on the Strategic Heritage Plan in Geneva, the General Assembly adopted resolution 70/248, which contained several paragraphs related to the treatment of contingency funds within an overall project budget. The Assembly emphasized (resolution 70/248, sect. IX, para. 19) that contingency provisions approved for construction projects serve to provide necessary safeguards against unforeseen cost overruns during project implementation; underlined that the estimation of project contingencies should be based on the identification of risks associated with the different phases of the project; and requested that the estimated contingencies be separated from the base project cost for presentation purposes only (ibid., sect. X, para. 17). Therefore, the Secretariat understands that the term "budget" or "approved budget" of these two projects includes all estimated project costs, inclusive of both the base estimate

and the contingency provisions. Furthermore, the Secretariat considers that the same interpretation of what construes the "budget" shall be applied to other ongoing capital projects currently being implemented or planned by the Organization, including the Mechanism's new facility at Arusha.

26. **The Advisory Committee is of the view that the requirement of the General Assembly resolution, that the estimated contingencies be separated from the base project cost for presentation purposes only, is consistent with the request of the Assembly that in the future, any cost overruns are first met from compensatory reductions identified elsewhere through efficiencies in order to obviate to the extent possible the need for drawdown from contingency provisions (General Assembly resolution 69/276, paras. 8 and 9). Moreover, the Committee points out that the Assembly has also decided that all remaining unused contingency funds shall be returned to Member States at the conclusion of the project (resolution 70/248, sect. IX, para. 20, and sect. X, para. 18).** The Committee intends to provide further observations related to project contingency provisions in its forthcoming report on the strategic capital review (A/70/7/Add.43).

Travel costs

27. Concerning travel expenditures, the Advisory Committee notes that compared with the approved budget of $99,086, the expenditures amount to $126,649, representing an overexpenditure of $27,563, or 12.8 per cent. The Committee was informed upon enquiry that no further trips were planned until the completion of the project. The Advisory Committee sought explanation for the higher-than-budgeted expenditures on travel and requested a breakdown of the planned and additional trips taken. The Committee was informed of the following:

(a) The planned travel included primarily trips by the Office of Central Support Services team in New York and the project team for detailed design meetings, detailed surveys of the approved site, procurement-related activities, such as bidders' conferences, technical evaluation committee meetings, and oversight activities. Most of the planned travel was undertaken during the pre-construction phase. Provision and solicitation of technical advice between the Office of Central Support Services and the Mechanism were conducted by means of regular teleconferences, phone calls and correspondence;

(b) According to the Secretary-General, some unforeseen trips became necessary, relating to (i) travel to meet with the architects in Oxford, United Kingdom, in order to ensure the conformity of the detailed design with the approved budget for the project; and (ii) the official mission of the Assistant Secretary-General for Legal Affairs to Dar es Salaam to conclude the negotiations and proceed to the signing of the Supplementary Agreement to the Agreement between the United Republic of Tanzania and the United Nations concerning the Headquarters of the International Residual Mechanism for the Premises of the Mechanism. It was determined that this was the most expeditious way to conclude the agreement.

28. Upon enquiry, the Committee was informed that the mission to Oxford was unforeseen, but necessary in the light of the receipt of the preliminary design and cost estimates, which were significantly in excess of the budget allocation. Upon clarification, the Committee was informed that the contract requires that the architects submit proposals within the budget allocation. However, consultations prior to the trip had not led to the expected results and it was therefore considered

that meeting with the architects was in the best interest of the Organization. The Committee was further informed that this travel was not included in the architectural services contract. **Considering that the contract requires that the architects submit proposals within the budget allocation and that the preliminary design and cost estimates by the architects were significantly higher than the budget, the Advisory Committee is of the view that as a matter of principle, costs such as those for the additional travel should not be borne by the Organization.**

IV. Other matters

OIOS audit

29. The Advisory Committee recalls that to ensure effective oversight of the implementation of the construction of the facility pursuant to the General Assembly resolution 67/244 B, the Office of Internal Oversight Services (OIOS) conducts a three-stage audit process which covers pre-construction, construction and post-occupancy phases, and that the procurement exercise for the architectural consultant and construction services are covered by the audit of the pre-construction and the construction phases, respectively (A/69/788, paras. 8 and 19).

30. The Secretary-General reports that the first audit of the project, which focused on planning and governance in the pre-construction phase, concluded on 28 February 2015 and the results were reported by OIOS through its annual report (A/70/318 (Part I) and (Part I/Corr.1). According to that report, which contained satisfactory comments, including on the procurement of architectural consultancy services, OIOS found no critical or pervasive deficiencies. All of the four important recommendations raised have been closed (A/70/698, para. 33). Upon enquiry, the Committee was informed that the four recommendations, classified as important, were related to the provision of fraud awareness training, finalization of the project management plan, procedure for processing change orders and identification of associated costs.

31. With respect to the award of the construction contract at a higher-than-budgeted price (roughly 4 per cent above budget), it is indicated that it was attributed mainly to the costs of imported electromechanical materials and equipment, which were more costly than expected owing to unforeseen market conditions (A/70/698, para. 11). Detailed information related to the considerations for the award of the construction contract is provided in paragraph 57 (a) to (e) of the report of the Secretary-General. Upon enquiry, the Advisory Committee was provided with information on the procurement of the construction contract (see the annex to the present report). **The Advisory Committee looks forward to the OIOS audit on the construction phase of the project, including the procurement of the construction contract, in the context of the next progress report of the Secretary-General on the project.**

Utilization of furniture and equipment

32. The General Assembly recalled paragraphs 31 and 32 of the report of the Advisory Committee (A/69/788) and in this regard encouraged the Secretary-General to continue to explore the possibilities for utilizing usable furniture and equipment from the International Criminal Tribunal for Rwanda and the

International Tribunal for the Former Yugoslavia, where possible and economical, and to report thereon in the context of future progress reports (General Assembly resolution 69/276, para. 11)

33. The Secretary-General indicates that during the reporting period, the Mechanism strengthened its coordination and intensified its efforts to identify existing assets of the Tribunal for Rwanda that could be reused in its new facility, particularly in the light of the closure of the Tribunal for Rwanda on 31 December 2015. Thus far, the Mechanism has transferred more than 400 non-expendable assets from the Tribunal for Rwanda, amounting to over $3 million based on acquisition value, including office furniture, as well as office, security and information technology equipment (approximately 60 per cent of the required furniture) (A/70/698, paras. 64 and 65).

34. The Secretary-General indicates that the continued efforts by the Mechanism regarding the reuse of existing assets from the two Tribunals have resulted in savings and efficiencies (ibid, para. 63). As to how much savings could be achieved within the budget, the Advisory Committee was informed upon enquiry that savings realized by reusing Tribunal for Rwanda assets were primarily reflected in the Mechanism's assessed budget, and may be better described as "cost avoidance", rather than "savings", which may imply a reduction against already approved budgets. The Mechanism estimated that it would be able to take approximately $2 million worth of assets transferred from the Tribunal for Rwanda to the new facility, which it would otherwise have been necessary to purchase. Upon further clarification for the difference in the $3 million reported in of the report of the Secretary-General (ibid., para. 65) and the $2 million indicated to the Advisory Committee, it was explained to the Committee that the amount of $3 million reflected the amount of assets that the Mechanism had received from the Tribunal for Rwanda since the commencement of its Arusha branch. Of this amount, the $2 million reflected the value of assets that would specifically be used at the new facility. The Mechanism's budget for the biennium 2016-2017 took into account the transfer and reuse of assets from the Tribunal for Rwanda, amounting to $2 million. The Advisory Committee notes that the Secretariat did not provide an explanation for the discrepancy in the asset value of $1 million transferred from the Tribunal for Rwanda. **The Advisory Committee considers that the information provided by the Secretary-General, in particular the value of the assets transferred to the Mechanism and the related savings, lacks clarity and consistency. The Committee recommends that the General Assembly request the Secretary-General to provide explanations and clarifications in his next progress report on the project.**

Accessibility

35. The Advisory Committee recalls that according to the Secretary-General, the architectural design of the new facility has taken into full consideration the Convention on the Rights of Persons with Disabilities with respect to the provision of accessible building features (A/69/788, para. 7 (a)). Upon enquiry, the Committee was informed that the design observes prevailing local practices and codes with respect to accessibility. This is contained in the Tanzanian 2010 Persons with Disabilities Act, mandating that buildings that provide services to the public are accessible, to the extent possible, to persons with disabilities. The Advisory Committee notes that the project design observes prevailing local practices and

codes with respect to accessibility for persons with disabilities. The Committee will provide further comments in this regard in its forthcoming report on the strategic capital review (A/70/7/Add.43).

Local knowledge

36. The Advisory Committee recalls that the General Assembly, in its resolution 69/276, encouraged the Secretary-General to continue his efforts to include local knowledge and capacity in the implementation of the project. The Secretary-General provides the related information in paragraphs 40 and 41 of his report (A/70/698). **The Advisory Committee trusts that the Secretary-General will continue his efforts to include local knowledge and capacity in the implementation of the project (A/69/788, para. 9).**

Planning of the post-construction phase

37. According to the Secretary-General, immediately after the construction phase began, the Mechanism started planning the post-construction phase through the creation of a dedicated working group tasked with identifying and coordinating the implementation of all actions required to ensure the timely and efficient occupation of the new facility. The working group has also received technical guidance and support from the Office of Central Support Services. Since its inception, the working group has identified end users and their requirements and concluded the early stages of planning for the move of staff, archives and assets. Moreover, in implementing the lesson learned in other capital projects that consideration should be given to early engagement with the facilities management services and the development of maintenance requirements, the position of Facilities Management Assistant, funded through the Mechanism's budget for the biennium 2016-2017, is currently being recruited to ensure the smooth transition and continuity of knowledge in the subsequent operation and maintenance of the facilities (A/70/698, paras. 66 and 68).

V. Conclusion and recommendations

38. **The Advisory Committee recommends that the General Assembly take note of the report of the Secretary-General, taking into account its comments and recommendations in the preceding paragraphs.**

Annex

Information on the procurement of the construction services contract

The Advisory Committee was provided with the following information on the procurement of the construction services contract:

(a) The unforeseen market conditions were one of the circumstances considered in deciding to award a higher-than-budgeted bid. The cost estimates were originally established by referencing the actual costs of the new office facility at the United Nations Office in Nairobi, which was completed in 2010. Based on the best available information in analysing past trends in construction escalation in the region, the cost estimates performed in 2012 for the new facility for the Mechanism estimated forward escalation at a rate of 4 per cent until the time of contract award in 2015. While the bid prices for locally available materials came in almost precisely at the budgeted amounts, the escalation of prices of imported materials and other additional costs could not have been reasonably foreseen. The commercial evaluation indicated that the bid of the selected construction company was also consistent with the prevailing market conditions;

(b) Although the Organization makes every effort to avoid awarding a tender that is higher than the budgeted amount, it is fully in accordance with normal procedure to award a contract at a higher-than-budgeted amount provided the principles of United Nations procurement and other requirements of the Procurement Manual are followed;

(c) The use of approved contingency provisions for covering the risk associated with the tender process is in line with industry standards, as well as the recently published "United Nations Guidelines on the Management of Construction Projects".
